

What we purchase and sell

# Material list

## Introduction

Established in 2009, Polyexim International Trading is a comprehensive plastic trading company headquartered in Spijkenisse, The Netherlands. Specializing in the buying and selling of prime virgin, regranulate, regrind, compound, post-industrial, and post-consumer waste scraps in various forms, we collaborate directly with waste collection companies, recycling firms, and plastic end-product manufacturers to ensure the delivery of high-quality products at competitive prices. Dealing with all types of plastics, we focus on acquiring and distributing plastic products that have reached the end of their commercial lifecycle and are suitable for recycling. Renowned as a trusted name in international sourcing, marketing, and distribution of plastics worldwide, Polyexim International Trading leverages its extensive expertise in plastics and recycling applications to serve as the ideal partner for fulfilling your requirements.
